I wanted to play through more of this game before I reviewed it but sadly that doesn't seem to be an option right now. This game has at least one game breaking bug were your character can't jump, this makes part of level 2 incompletable as you need to complete a jump puzzle to progress.

The gun play is okay, but the aim system needs work with most of the guns shooting high when you look down sights.

The movement is actually pretty nice, it feels like an old school FPS

The HUD needs a lot of work, it's hard to keep track of ammo and health because of how small the numbers are.

Speaking of ammo there seems to be multiple guns that take up the same slot but don't necessarily use the same ammo, this is never explained and makes the MP 5 halfway through the first level something of a trap.

Speaking of explanations expect none, this game has no in game tutorial and no dialog or introduction to explain who you are, where you are, what you are doing, or what you are fighting.

The controls aren't hard to figure out but a few on screen prompts would be nice. the story desperately needs some exposition, the first level finds you in an abandoned space ship infested with robots and the second level jumps to a forest. I'm guessing you crashed the ship into the forest, but now the military are after you?

In any event it has some good stuff and for the price I can overlook some of the quarks with the hud, story and start of the game. But the jump bug needs to be fixed before I can recommend it

. took me a little while to figure it out, but it wasn't too hard. Honestly, not a bad game! definitely not my go to, but worth it once it was on sale. Graphics are very old school, even when boosted to ultra. but that is intentional. it's supposed to play like a doom/half life type of game, and it did well on that!. I got this game because I typed it in to Google looking for a board game. Ended up buying and I played a good 20 minutes ish. It gives me heavy Half-Life vibes. If you can't get Half Life, get this.

Half Life is your Dr. Pepper

The Resistance is your Dr. Thunder
